

LWC app hosted as an experience site

the theme of this app is for a fictitious real estate company that offers rentals

your app should include a list of properties owned by the company that are up for rent

guest users should be able to come to the site without logging in and view open rentals

guest users should be able to request a tour for a specific property

guest users should be able to self-register for your website and login

logged in users should be able to add family members and pets to their household

if logged in users are currently staying at a property, they should be able to submit maintenance requests

Rent should be added and associated with a renter at the first of each month

logged in users should be able to see their monthly statements from an account portal
